EDUCATION

Brown University

Providence, RI

Bachelor of Science in Computer Science and Economics with Entrepreneurship Certificate

Expected May 2027

- Relevant Coursework: Statistical Inference I, Computer Science Integrated Introduction, Principles of Economics, Management of Industrial and Nonprofit Organizations

EXPERIENCE

Back End Developer

June 2024 – Present

Stealth Startup

Remote

- Designed backend architecture for the **MVP** by prioritizing low cost options (i.e. **Google Firebase**, **Flask**, **Hostinger**)
- Created **NoSQL database** to secure user data, and built **Flask** server to manage **API routes**

Data Product Engineering Intern

February 2024 – May 2024

MyDataProduct

Remote

- Conducted **SPIKEs** on industry-standard APIs (e.g., **Google's NLP API**) and successfully integrated them
- **Automated** development operations to speed up weekly production deployments by creating a script for **GCP SSL certificate renewal**
- Designed **YAML** configuration files with consideration for the **downstream impact**
- Participated in **daily stand up meetings** and conducted **Quality Assurance (QA) reviews** on merge requests to enforce team practices and adherence to industry standards

Research Assistant

September 2021 – May 2023

Connected Autonomous Vehicular System Research Lab at University of North Texas

Denton, TX

- Created Phantom Traffic Jam Project using **ROS** and **C++** to reduce congestion on roads
- **Mastered reactive methods** (i.e. PID controller, Wall Following, Follow the Gap) through F1tenth, creating a **complete Cooperative Car Following Model**
- **Honorable Mention** at 2nd Design Competition on Networked Computing on the Edge (International Postgraduate Student Competition)

PROJECTS

Find My Food | *ReactJS, AWS, Flask, MySQL*

January 2024 - May 2024

- Developed real-time dining hall menu tracking project with **CI/CD pipelines (Jest and Pytest)**
- Designed **AWS Lambda** functions to automate the life cycle of **RDS instances**, and to set up temporary **NAT gateways**, significantly decreasing operational expenses by **87.5%**
- Created **Python** web scraper with **BeautifulSoup4** package, which runs weekly and asynchronously

Connect4 AI Player | *ReactJS, Flask*

November 2023 - December 2023

- Developed Connect4 AI player, utilizing **Flask** to host the algorithm, and **Google Firebase** for tracking Wins, Losses, and Draws of AI model
- Devised a robust **minimax algorithm** with **heuristic evaluations** to calculate **optimal** moves

LEADERSHIP

VP of Technology

September 2023 – Present

Brown Technology Consulting Group

Providence, RI

- Oversaw the **club's website** (using **React**) and provided **expert guidance** on all software-related inquiries
- Revamped **revenue model** for social media influencer marketplace startup by performing **competitor analysis**, assessing the current **value proposition**, and formulating detailed **recommendations**

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, TypeScript HTML, CSS

Frameworks: ReactJs, ROS (Robot Operating System), Flask

Tools: GitHub, GitLab, Ubuntu, Firebase, AWS, GCP
